ROBERT G. LOEWY is professor of mechanical and aerospace science at Rensselaer Polytechnic Institute. His areas of research are structural dynamics and aeroelasticity, unsteady aerodynamics, magnetohydrodynamics, servomechanisms, and systems stability. He is a member of the National Academy of Engineering. Loewy has been a member of advisory groups to branches of the Department of Defense, a consultant to government agencies and private industry, and a member of the President's Science Advisory Board. He has a Ph.D. degree in engineering mechanics from the University of Pennsylvania, an M.S. degree from the Massachusetts Institute of Technology, and a B.A.E. degree from Rensselaer Polytechnic Institute.

CORA B. MARRETT is professor of sociology and Afro-American studies at the University of Wisconsin, Madison, where she has been a member of the faculty since 1974. She taught earlier at the University of North Carolina at Chapel Hill and at Western Michigan University. Her research, conducted through the Wisconsin Center for Education Research, focuses on minority and female students in precollege mathematics and science. She serves as a member of the steering committee of Science World, a project sponsored by the Wisconsin Department of Public Instruction, and as a board member for the Argonne National Laboratory. She has Ph.D. and M.A. degrees from the University of Wisconsin in sociology.

SAMUEL MESSICK is vice president and distinguished research scientist at the Educational Testing Service, Inc., and adjunct professor of psychology at the City University of New York Graduate Center. His research has been concerned with psychometrics, test validity, problems in human assessment, and cognition and personality. He has frequently been an adviser to federal agencies and an invited fellow and teacher at universities. He has Ph.D. and M.A. degrees in psychology from Princeton University.

PAUL E. PETERSON is program director of governmental studies at the Brookings Institution. From 1967 to 1983 he was professor of political science and education and also chairman of the committee on public policy studies at the University of Chicago. His research involves urban politics and policies, especially as they relate to

race and education. Peterson has Ph.D. and M.A. degrees in political science from the University of Chicago.

MARE TAAGEPERA is a lecturer in chemistry at the University of California, Irvine, where she has been on the faculty since 1975. She has been active in research in organic chemistry and has received several awards for outstanding teaching and leadership in science education. Taagepera is cofounder of a summer science institute for the retraining of elementary and secondary school classroom teachers. She has a Ph.D. degree in physical organic chemistry from the University of Pennsylvania.

DAVID E. WILEY is dean and professor in the School of Education at Northwestern University, a position he has held since 1979. From 1965 to 1979, he was a faculty member in the Departments of Education and Behavioral Sciences at the University of Chicago. During that period, he was also resident adviser to the Venezuelan Ministry of Education and a fellow at the Center for Advanced Study in the Behavioral Sciences. Wiley's research interests include educational policy, teaching-learning processes, evaluation, psychometrics, statistics, and survey research. He holds a Ph.D. degree in educational psychology from the University of Wisconsin, an M.S. degree in statistics from the same institution, and an A.B. degree in mathematics from San Diego State University.

SENTA A. RAIZEN is study director for the Committee on Research in Mathematics, Science, and Technology Education and also study director for the Committee on Indicators of Precollege Science and Mathematics Education. Previously, she served as study director for committees concerned with the evaluation of educational programs and the assessment of scientific research. From 1974 to 1978, she was associate director of the National Institute of Education, in charge of programs to disseminate and apply research results to education; before that she was a senior researcher at the Rand Corporation and, for 10 years, a program official in science education at the National Science Foundation. She is a fellow of the American Association for the Advancement of Science. She received a B.S. degree in chemistry from Guilford College and an M.A. degree in physical chemistry from Bryn Mawr College.

ROLF K. BLANK has served as research associate to the committee for six months. Previously, he was education study director at the COSMOS Corporation and at James Lowry and Associates, where he conducted a national study of magnet schools. He received a B.A. degree in history from Luther College, an M.A. degree in educational policy studies from the University of Wisconsin, and a Ph.D. degree in sociology from Florida State University.
